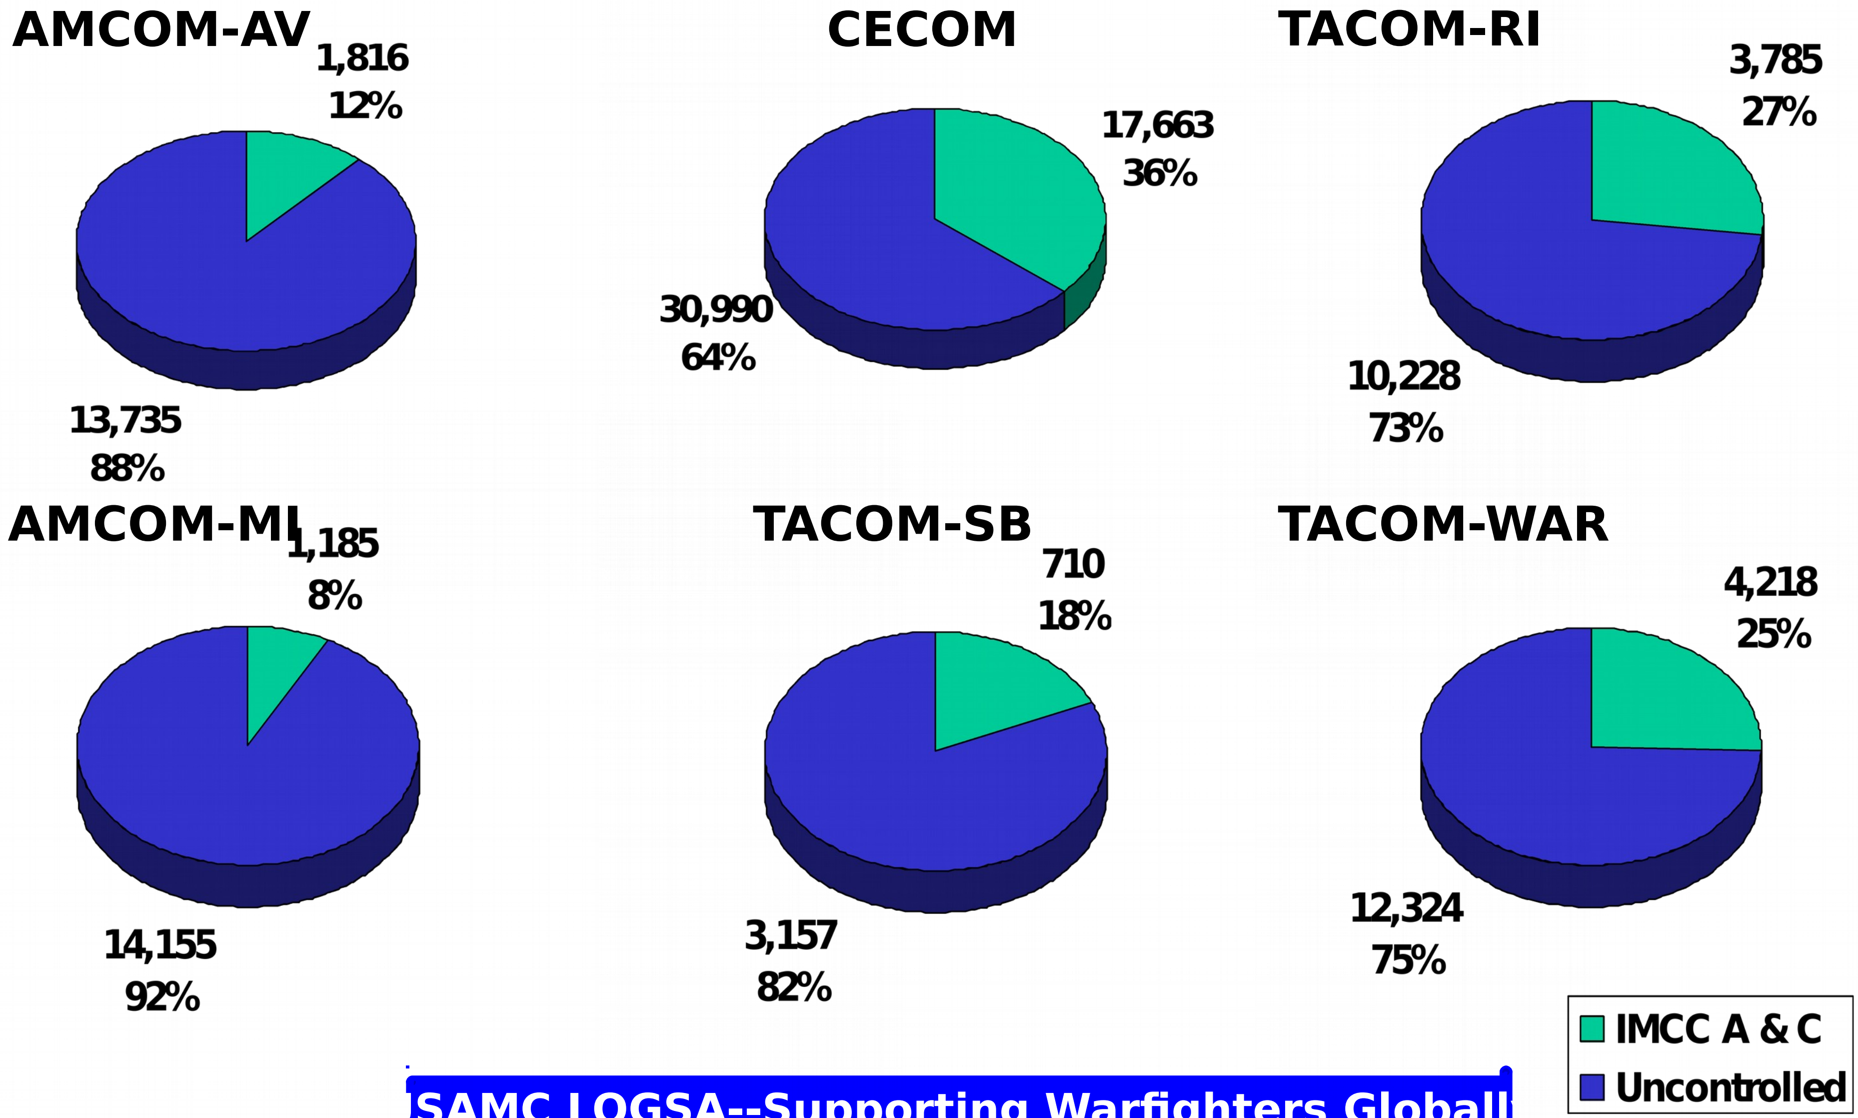
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – NOV 06



Nov 06 data as of 21 Dec 06

Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,030	1,816
AMCOM-M	917	1,185
CECOM	17,383	17,663
TACOM-W	590	4,218
TACOM-R	1,738	3,785
TACOM-SB	577	710

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
